- Historical production of 161 million pounds of copper at 2.2% grade from 1915 to 1930.
- Located in a mining-friendly county in NE California.
- PEA on Moonlight indicates an NPV(8%) of US\$179M after tax at \$3.15/lb copper.
- PEA economics exclude two other deposits which could increase size and value.
- Gold and silver credits present further upside; represented 20% of historic mined value.
